**Active Content Manager:**

- User-age validation
- Suggesting products to buy online

Please check the RTP Customer Portal at <https://support.activenetwork.com/rtp/> for other updates and documentation.

---

# New Features and Enhancements

- [7559] ONE|Store now validates the user's age when they create an account to make sure their age complies with the **Minimum Age to Log In**. The **Minimum Age to Log In** setting is configured in the ONE|Store client in **RTP Administration > Client Management**.
- [7728] ONE|Store has added a new feature for suggestive upselling when a guest is purchasing online. This feature can be added to the Product or Shopping Cart pages.

Users can define the number of suggestions and whether to suggest products already added to the cart. If suggestions have been enabled on the Product page, the Shopping Cart will now pop out and display the upsell suggestions when a product is added to the cart.

If upsell suggestions are enabled on the Shopping Cart page, the page uses the upsell products added to the Product page to show suggestions. Users can configure a specific number of suggestions to show on the Shopping Cart page.
