File Service Upgrade for GDPR Compliance

For GDPR-compliance and better performance, the file service has been upgraded to the latest version and the following file download enhancements have been implemented in the Admin site:

Batch File Download Limit: 1000

On the **Supplemental form submissions** page, when batch downloading supplemental forms, a maximum of 1000 files can be selected each time and downloaded as a single zip file.

After selecting the required participants, if more than 1000 files are selected, then clicking the **Download forms** button displays an error message.

Location: Admin site > **Home** tab > a season > **Supplemental forms** tab

The screenshot shows the 'Supplemental form submissions' page for the 'Yoga 2018-2019' season. The page includes a navigation bar with tabs for Dashboard, Sessions, Coupons, Reports, Supplemental forms, and Group assignments. The 'Supplemental forms' tab is active. Below the navigation bar, there are filters for Sessions, Type and status, and Form names. The 'Download forms' button is highlighted with a red box. Below the filters, a table lists 1020 files, with the first 10 rows visible. The 'Download forms' button is also highlighted with a red box. A 'Notice' dialog box is displayed over the table, stating 'You can only download up to 1000 files at a time.' and has an 'OK' button.

URL Pattern Change

The file download URL pattern has been changed to:

<https://fileserver.aw.active.com/file-server/rest/files/13875c76-5ef0-4d0a-adab-b983c80ea165>

In already sent emails, the old download URLs continue to work.

Performance Enhancements

In the CUI, order with more than 100 product IDs can now be processed successfully.
