# Camp and Class Manager Release Notes

## New features

### Waitlist invitation email: rich text

The **Waitlist invitation email** (in the season setup flow > **Waitlist automation** step) is now editable. This allows organizations to create waitlist invitation email templates that match their branding and deliver highly personalized invitation emails to waitlisted registrants. In addition to the existing **Customize header** function, they can now create eye-catching and engaging emails by:

- customizing content fonts, font sizes and styling.
- inserting merge fields (session name, participant name, date, time and time zone) into the email content.

They can also reset the email to the default content by clicking the **Reset content** button.

The screenshot displays the 'Step 9: Waitlist automation' configuration page. The main area is titled 'Waitlist invitation email' and contains a rich text editor. The editor's toolbar is highlighted with a red box, showing options for font face (Arial), size (12), bold (B), italic (I), underline (U), list, indent, and text color. The email content includes a header with the 'ACTIVE' logo, a greeting 'Hi {participant name},', and a message about a registration opening. The text uses merge fields like {session name}, {data& time& time zone}, and {Session Name}. A 'Complete registration' button and a 'Remove me from waitlist' link are at the bottom. On the right sidebar, the 'Waitlist automation' option is selected and highlighted with a red box.

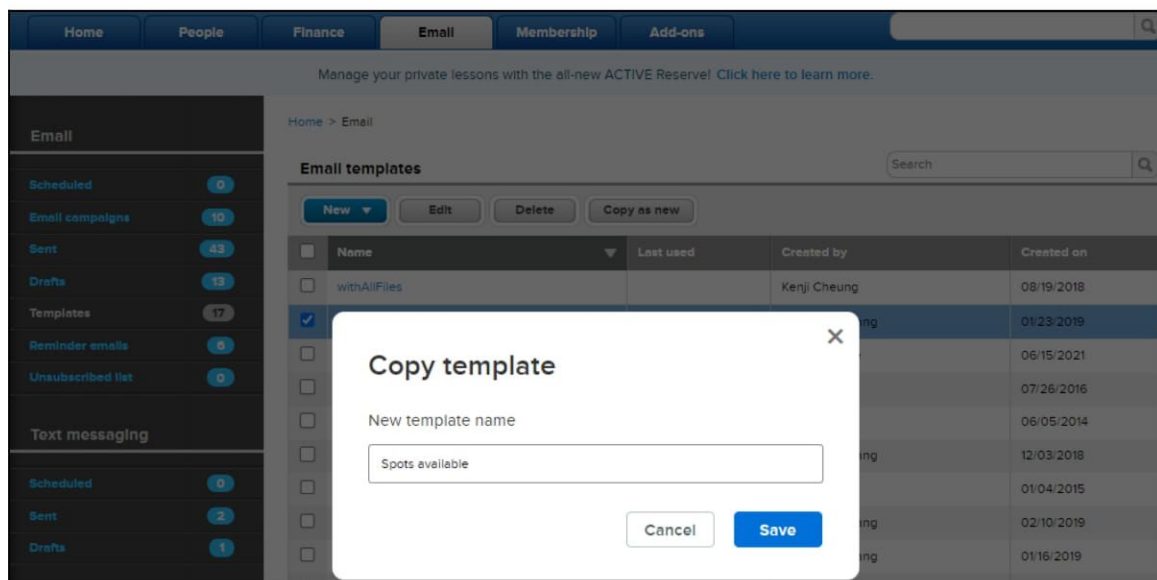

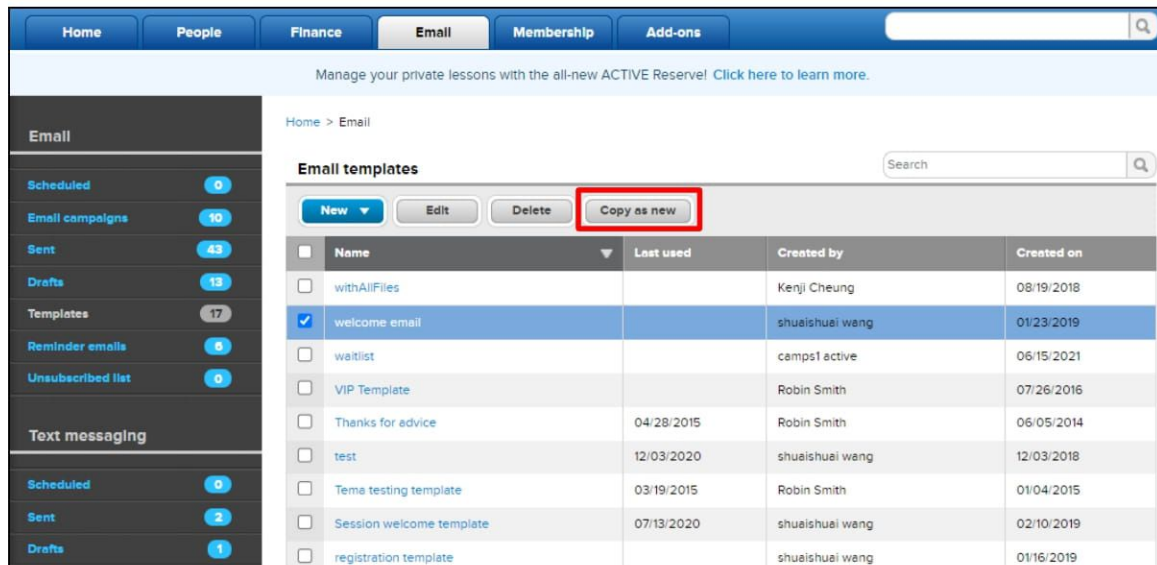

## Camp and Class Manager Release Notes

### Copy an email template

The **Email** tab on the home page allows organizations to send both marketing and event information emails. Organizations have complete control to:

- create templates that match their branding.
- create campaigns to automatically send emails based on rules/triggers.
- seamlessly integrate emails with segments of people created from the customer database.

When creating a new email template in **Email > Template**, agency users can now copy an existing template by selecting the template and clicking the **Copy as new** button:

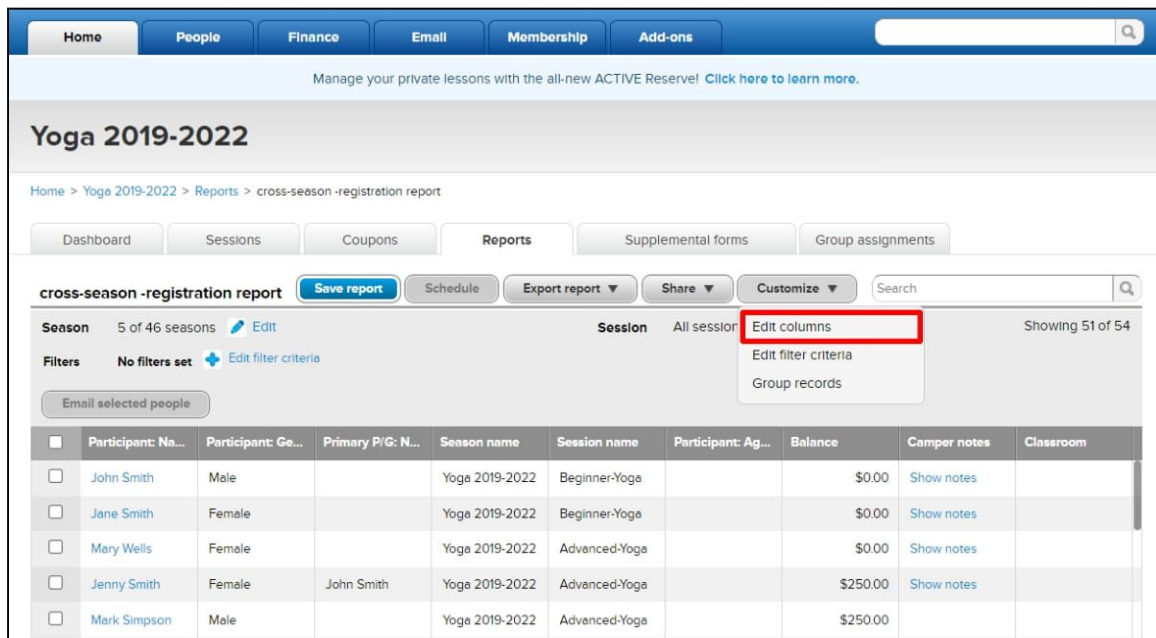

### Custom reports: session days of the week info

In the AUI > a season > **Reports** > a custom report, agency users can now:

- Add a days-of-the-week column to a report by adding the **Customize > Edit columns > Day of week** column.
- Filter a report by days-of-the-week by setting the **Customize > Edit filter criteria > Day of week** option.
