New features

ACTIVE Captivate Portal: configure cut-off time for self-check-ins

In the ACTIVE Captivate Portal, agency users can now configure a cut-off time for self-check-ins in **General** > **Self check in/out** > **Self check-in** > **Cut-off time**:

- The cut-off time must be later than the check-in time.
- The cut-off time range can be an integer number (from **0** to **60**) of **Minutes** or **Hours**, and **Before** or **After** the start of the activities.
- By default, the cut-off time is **30 Minutes After** activities start.

The screenshot shows the 'Self check-in' configuration page in the ACTIVE Captivate Portal. The left sidebar contains navigation links: Front desk, Notifications, Customer management, Activity setup, General, Self check in/out (selected), and Branding. The main content area is titled 'Self check-in' and contains the following configuration fields:

- Within distance***: 20 KM
- Check in time***: 48 Hours before activities start
- Cut-off time***: 30 Minutes After activities start (highlighted with a red box)

Below these fields, there is a search bar and a list of activities:

- For activities*: OCT 28 testing check L..., In this new session for..., Chengdu Chew sessio..., Session one for seaso..., Session one for seaso..., CC session for MQretri...

In the ACTIVE Captivate mobile app, after the cut-off time, consumers are no longer shown the option to self-check into a session.
