ACTIVE Captivate for Camps and Class Manager (CCM) Release Notes

ACTIVE Captivate Consumers iOS/Android apps: Receiving a congratulatory notification for completing a challenge

After a consumer completes a challenge, a congratulatory notification is displayed in the notification list. If the consumer has not read the notification, the congratulatory notification popup page automatically appears upon opening the app.

ACTIVE Captivate for Camps and Class Manager (CCM) Release Notes

ACTIVE Captivate Consumers iOS app: Asking users to turn on notifications

When users open the **Messages** tab on their mobile device and without having notifications enabled, a widget will appear on that tab to proactively ask them to turn on notifications.

- If users tap **Enable**, they will be taken to the mobile settings page. If they ignore the reminder after tapping **Enable** and return to the app, the reminder will not reappear.
- If users tap “x”, they will not see the notification reminder again unless they close the app and re-open it or log out and log in again.
