

## Product Release Notes for ACTIVEWORKS Endurance – July 16, 2019

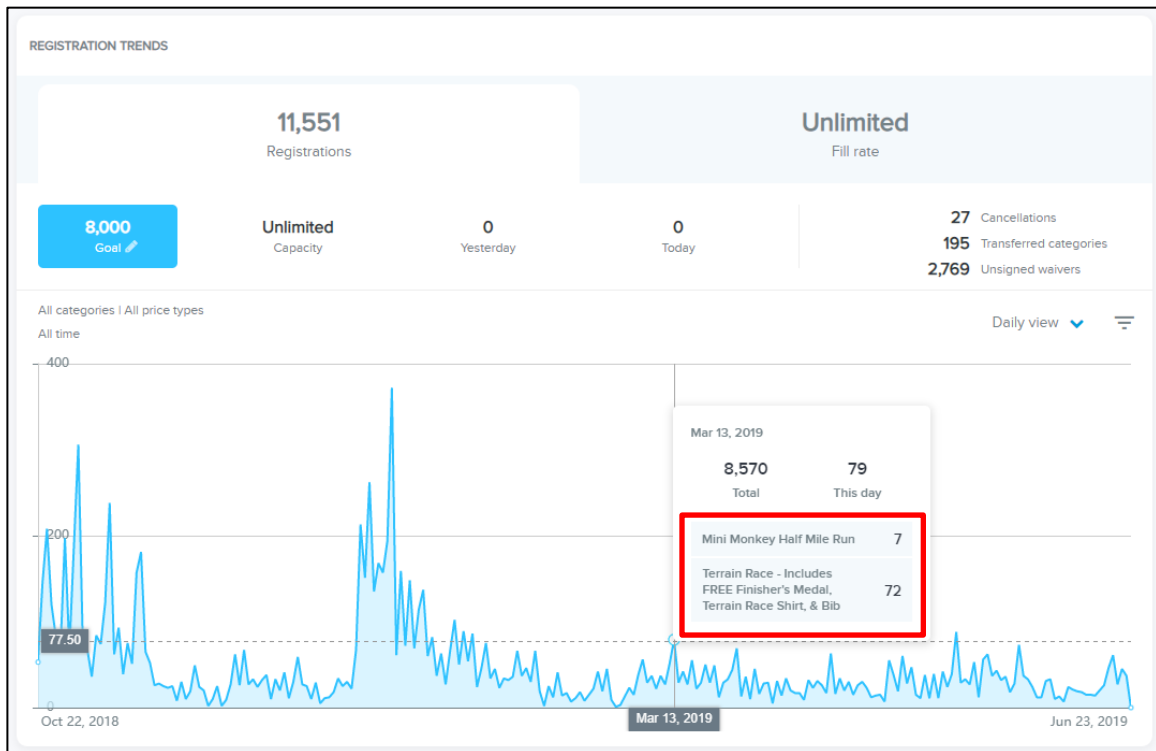

### Table of Contents

Registration trends component: Registrations by category .....	2
Photo management .....	3

## Registration trends component: Registrations by category

In the **REGISTRATION TRENDS** dashboard component (a Premium-tier feature), see at-a-glance exactly how many customers registered in each of your event's categories in a day/week/month, by hovering the cursor over a point on the line chart:

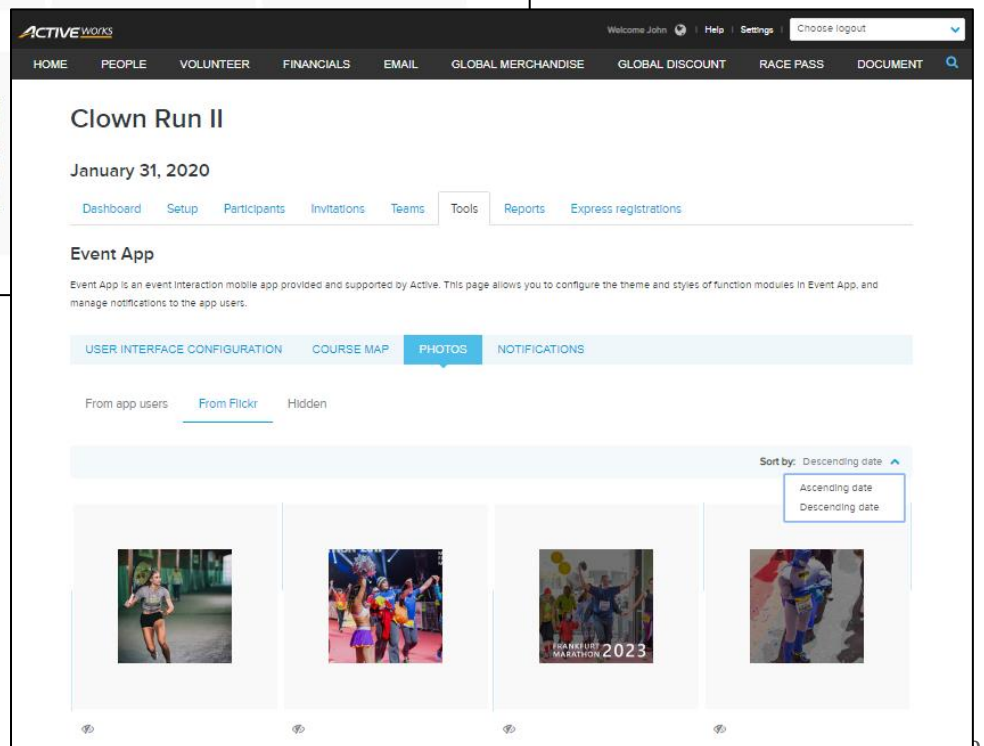

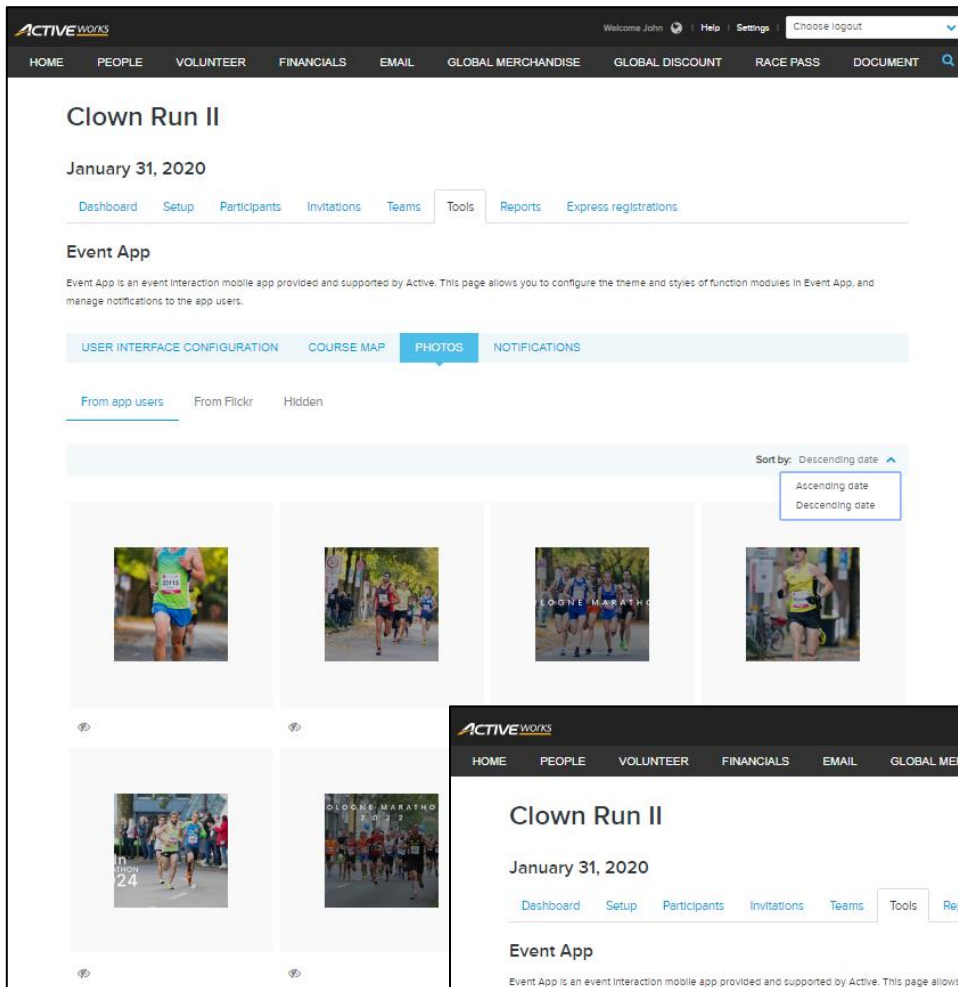

## Photo management

As an Elite-tier organization, you can now view photos that were uploaded by spectators or participants from the Experience App or Flickr and hide any unsuitable photos from public display.

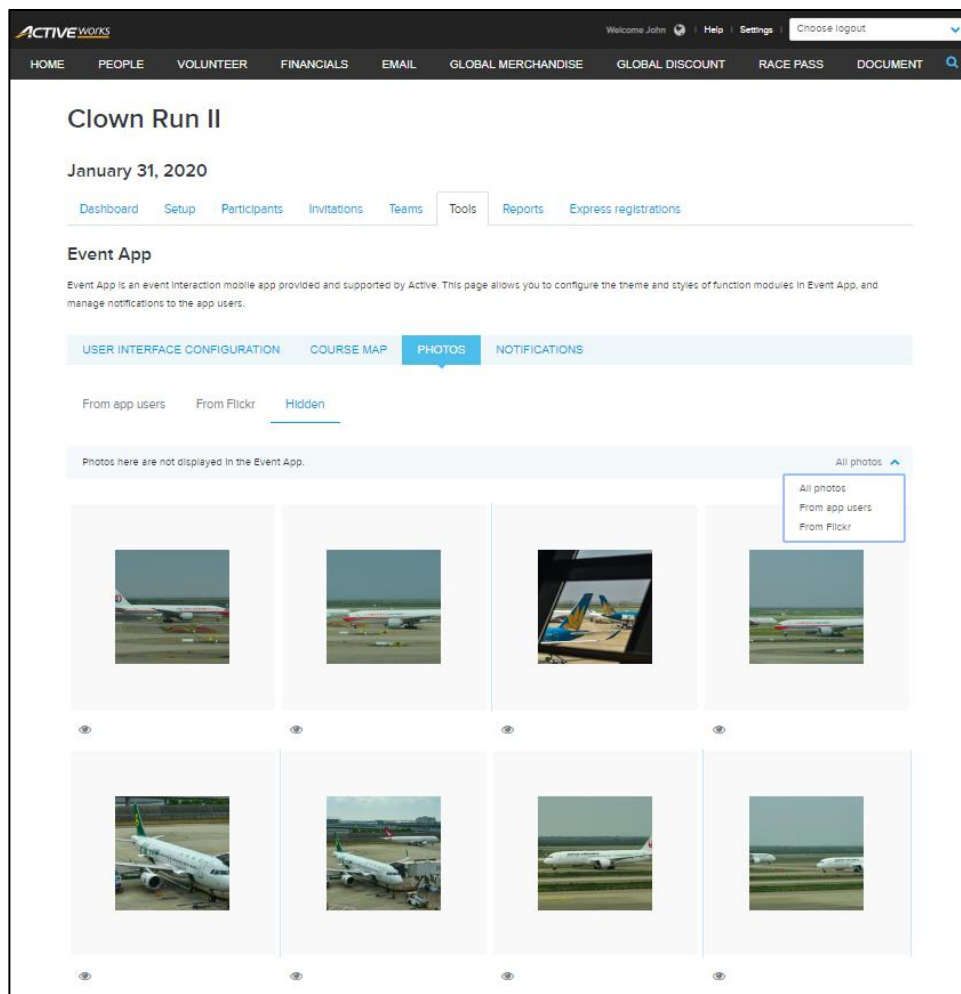

If the Experience App is configured to display the **Photos** component, then then the new **PHOTOS** tab is displayed. You can click either the **From app users** or **From Flickr** tabs to view and manage photos from either source:

- To sort the photos by date, click the **Sort by:** dropdown and then select **Ascending date** or **Descending date** (default) as required.
- To open a full-sized photo in a new browser tab, click the required thumbnail.
- Fifteen rows of four thumbnails per row are displayed. To load more thumbnails, click the **More** link at the bottom of the page.
- To hide an unsuitable photo from public display (without deleting it), click the hide (🔒) icon under the thumbnail. Hidden photos are greyed-out and will be moved to the **Hidden** tab when the tab is refreshed (by clicking the **From app users** or **From Flickr** tabs).

Hidden photos are displayed under the **Hidden** tab:

- To view hidden photos from a specific source, click the **All photos** dropdown and then select **All photos**, **From app users** or **From Flickr** as required.
- To open a full-sized photo in a new browser tab, click the required thumbnail.
- To unhide a photo, click the unhide (👁) icon under the required thumbnail. Unhidden photos are greyed-out and will be moved back to either the **From app users** or **From Flickr** tab when the tab is refreshed (by clicking the **Hidden** tab).
