Participant wave selection during registration

Previously, to allow participants to choose waves during registration, organizers were creating additional price types or categories, or creating form questions and adding the values later. Admittedly, this was not a friendly experience for organizers or participants.

Now we've improved the wave selection experience. You can configure an additional purchase to be the wave value. Participants can easily select their wave choice during registration and that value is automatically saved as the wave within ACTIVEworks Endurance. For you, the organizer, you receive the ability to manage capacity and even charge for premium waves.

During event setup, you can configure an Additional purchase as a wave value:

Then, during registration in the **MERCHANDISE** purchase step, participants can select their required wave:

Select	Price	Quantity
Small	Free	0

Select	Price	Quantity
-Select one-	Free	0

No

Participants' selected waves are displayed to you and your staff wherever the **Wave** field is present, such as in the **Registrations** report.

Just like regular Additional purchases, you can also allow participants to select their wave post-registration (on their My Events page or during event check-in via the Onsite app).

Controlling access to the Bib Tool

You can now control which users can access the Bib Tool, making it easier for you to delegate this task to staff and timers without giving them too much access.

By default, only **Owner**, **Coordinator**, **Assistant**, and **Timer** role users have the new **Bib management** permission, which you can also assign to your custom roles.

Existing custom roles with the **Event maintenance** permission also include the **Bib management** permission, but custom roles assigned the **Event maintenance** permission in future will no longer include the **Bib management** permission.

The **Bib management** permission grants a user access to the Bib Tool only for events to which they have access.

Automatic bib updates when participants' change their answers

The Bib Tool now automatically keeps track when participants change their answer to a question that affects their assigned bib number, so you don't have to.

For example, if a participant changes their estimated finish time, then the Bib Tool will automatically update their bib number according to the configured bib rules.

If required, you can set a deadline date after which the Bib Tool will ignore any changes made by participants:

Gender Equal to Male

Date of birth Before 4/9/2000

Bib sequence M 001

Exclude a number or range of numbers from this sequence

Separate multiple numbers with commas and number ranges with hyphens. Example: 237,238,800-850. These numbers will be skipped when bib numbers are assigned automatically.

Assign the same bib to members of a group.

Suffix bibs for relay team members with a capital letter.

Re-assign bibs if participants change their answers before this date

Last date to re-assign * 5/31/2018

Cancel Save

Note that group team members who share the team captain's bib number are only reassigned a new bib number if the captain changes an answer and is reassigned a new bib number.

Removing unwanted registrations

During registration, friends or family members may get cold feet; if so, your customers can now click **REMOVE** or **x** to easily remove a person's unwanted registration, without having to restart the whole order from scratch (and risk them not placing the order at all):

The screenshot shows a registration interface with the following elements:

- Registration** header with a warning: "You may lose your registration spot if your browser session is idle for more than 15 minutes."
- Account information: "alexander@activenetwork.com" with a "Change account" link.
- YOUR INFORMATION** section with a profile card for "Lee Alexander (alexander@activenetwork.com)" and a "COMPLETE" button.
- Running-1K - Individual A 198060301** section with a "Participant #1" header and a dropdown menu labeled "Who is this registration for?". Below the dropdown are "REMOVE" and "NEXT" buttons.
- Running-1K - Group-registration person 198060501 > 198060601** section with a "Team #1" header and a profile card for "Lee Alexander TEAM CAPTAIN". A red box highlights an "x" icon in the bottom right corner of this section.

Race Passes: Configure eligible categories and events

Race Passes (an Elite-tier feature) are a convenient and enticing way for your organization to get customers to participate in many events across your event portfolio.

Race Pass eligibility can now be configured at the category and event level, giving you better control of which events a Race Pass holder can register for.
