## Registration enhancement: simplified participant selection

During registration to avoid confusion for registrants and to reduce athlete services enquiries, your customers can now more easily select whether they are registering for themselves, on behalf of an **Other adult (18+)** or on behalf of a **Minor (under 18)**:

### Desktop:

The desktop registration form is titled "Registration" and shows a progress bar with "SELECT CATEGORY", "COMPLETE FORM", and "CHECKOUT". The user is logged in as "charlie.jiang@activenetwork.com". Under "YOUR INFORMATION", the user "John Smith" is listed as "COMPLETE". The selected category is "Triathlon-Full/Long Distance - Individual Age group/open" with a price of "\$100.00". A red box highlights the participant selection options: "John Smith" (selected, "Myself"), "Other adult (18+)", and "Minor (under 18)". Below this is a "PARTICIPANT INFO" section with fields for "Participant name" (John Smith) and "Gender" (Male).

### Mobile:

The mobile registration form shows the same information as the desktop version. A red box highlights the participant selection options: "John Smith" (selected, "Myself"), "Other adult (18+)", and "Minor (under 18)". Below this is a "PARTICIPANT INFO" section with fields for "Participant name" (John Smith) and "Gender" (Male).

## Race Passes: offer discount coupons

Promote the sales of your Race Passes (an Elite-tier feature) by offering discounts on Race Pass purchases.

The previous process of managing multiple Race Passes at different price points is now dramatically simplified and you can easily integrate a Race Pass product seamlessly into your promotional campaigns.

You can discount Race Passes with the same flexibility as a Category Registration by offering a flat or percentage discount, and combine that discount with maximum number of uses and expiry date settings (for more information, see the Support Centre article [here](#)).

Create a **GLOBAL DISCOUNT** coupon just as before, but now **Select the race passes to which to apply the discount:**
