Customizing templates for CUI events registration formsError! Bookmark not defined.

Email Validation

Our new email validation feature enhances the sign-up experience by ensuring users enter a valid email before completing registration. This reduces fake or mistyped emails, leading to high quality data, improved deliverability, and fewer failed logins. Check out our [demo video](#)!

A screenshot of the Passport sign-up form. At the top is the Passport logo. Below it is the heading "Sign up". The form has a label "Email address *" above a text input field containing "testemail@gmial.com". Below the input field is a yellow warning box with a triangle icon and the text: "It looks like there might be a typo in your email address. Could you double check if it's typed correctly? If there are no issues, please continue with your registration." Below the warning box is a large orange button labeled "Next". At the bottom of the form, it says "Already have an account? [Sign in](#)" followed by "OR" and a horizontal line.
