Reactivating deactivated program groups 2

Reactivating deactivated program groups

Coaches can now reactivate a deactivated program group by clicking the **HOME > Your programs > a program > Registration setup > Groups > Edit button > an Inactive group > Reactivate** link:

The screenshot shows the 'Edit groups' page in the ACTIVE SwimManager interface. The top navigation bar includes 'HOME', 'ATTENDANCE', 'PEOPLE', 'VOLUNTEERS', 'COMMUNICATIONS', 'REPORTS', and 'TOOLS'. The user is logged in as 'camps ForLeeyee!'. The page title is 'Edit groups'. A diagram shows a 'Season' branching into 'Group 1' and 'Group 2'. A note states: 'Groups enable you to divide your program by specific criteria for registration purposes, such as by price, age range or experience. At least one group is required.' Below this is the 'Your groups' section, which contains a yellow warning banner: 'Swimmers have signed up for this group.' The group details form includes: Name (Group1), Description (255 characters maximum), Capacity (Unlimited), a checkbox for 'Allow waitlist registrations when capacity is reached', Age range (with 'through' and 'as of' fields), and Gender (Coed). A red box highlights the 'Inactive Reactivate' link in the top right corner of the form area.

This screenshot shows the 'Edit groups' page for a deactivated group. The layout is identical to the previous screenshot, but the 'Inactive Reactivate' link is replaced by a 'Deactivate' link with a trash icon, located in the top right corner of the form area.
