Release Summary

The purpose of this Release Notes document is to provide a brief, informative summary of the items updated or added in this product release.

Besides providing this document, we will also update existing documentation in the Help Center to show updated workflows. If you have additional questions about this release, please contact the Support team.

Release 10.0 is mostly comprised of the new document upload feature. This allows parents to electronically upload required program documents that can then be viewed and accepted by organizational admins. New tools have been added to LeagueOne to make it easier to accept documents and also to accept outstanding check payments.

In addition, admins can now attach and manage non-program related documents to any person on the Person Maintenance page. This is useful for filing miscellaneous documents with the relevant individual.

# Enhanced Product Features

Document Management

Organizations can now specify that required documents can be uploaded electronically. By default this is turned **OFF,** so you will need to turn this feature on if you wish to use it by accessing Organization > Documents > Document Manager.

Note that it is possible to select more than one method of accepting documents – the By Upload feature is in addition to the current email, mail, and fax methods.

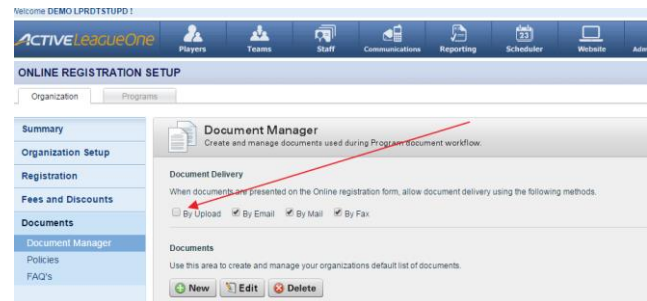

If you wish to control document delivery at the individual program level, then you can specify this when you create a program document. This is useful if you want to specify a document that you want sent by email only, but all other documents would be accepted by upload only.

If you specify that a document can be delivered "By Upload", then parents will see the upload document button after they have completed registration.

For admin users, we have also added new tools to support electronic document upload (replacing the existing Online Doc Reg Management Page); a new page for Document Management and a new page for Check Management. You can find both of these pages in the Players menu. We hope you will find these pages both attractive and easy to use.
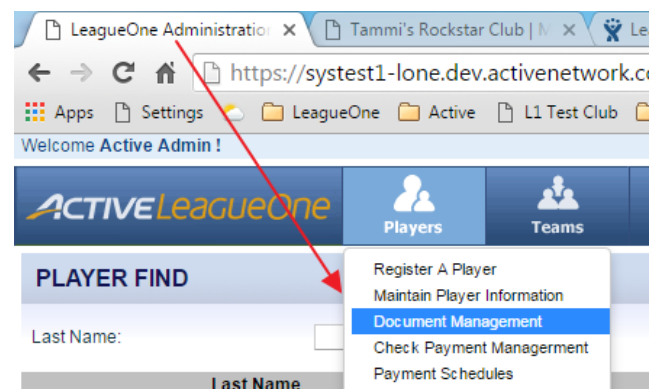

Document Management

Use this page to view required program documents. Filters are available to allow you to easily target those programs or individuals you would like to view. Use the Update Status action to record when a document is received. Emails are automatically sent to the primary guardian when a document is accepted.

Check Payment Management

Use this page to record outstanding check payments. Filters are available to allow you to easily target those programs, teams, or individuals you would like to view. Use the Record Check feature to record the check payment including amount, check number, and notes. Emails are automatically sent to the primary guardian when a check is received.

Non-Program Documents

You can now attach any type of non-program documents to any player or staff member on the Person Maintenance page.

Online Registration Updates

We continue to update Online Registration to make our registration flow even easier for your parents (we hope you've noticed!). In this release we have completely redesigned the receipt page to make it cleaner and simpler to understand, and made a number of cosmetic updates to improve the overall appearance of Online Registration. Look for more updates in this area in the next few releases as we continue to improve the user experience in LeagueOne.
Program Transfer Updates

In LeagueOne Release 9.8, we released the Program Transfer capability and we continue to update and improve this important feature. We've added a column on the Program Participants page to show you the Complete Form status after a transfer (this indicates whether the parent has completed the registration form after the transfer is complete).
